EDUCATION

Stanford University
Ph.D. in Electrical Engineering — Sep 2018 – Present
M.S. in Electrical Engineering — Sep 2018 – Dec 2021

National University of Singapore
B.Eng. in Electrical Engineering (Highest Distinction Honors) — Aug 2012 – Jun 2016

RWTH Aachen University
Exchange Student in Electrical Engineering — Apr 2015 – Jul 2015

ACADEMIC WORK EXPERIENCE

Research Assistant, Department of Biomedical Data Science, Stanford University — Apr 2019 – Present

- Developing spatiotemporal graph neural networks for patient disease trajectory prediction
- Developed multi-modal models for fusion of electrocardiograms and intracardiac electrograms for patient outcome prediction
- Developed graph neural networks and self-supervised pre-training methods for seizure detection and multi-class seizure classification from EEG signals
- Leveraged data valuation techniques to quantify data values in large-scale medical imaging datasets
- Developed weakly supervised learning methods to extract multi-class labels of seizure types from EEG text reports

Research Intern, Salesforce Research, USA — Jun 2021 – Sep 2021

- Developed a novel outcome-derived prostate cancer grading system that has significantly improved prognostic value than the existing Gleason score-based grading system using deep learning methods

Research Assistant, Stanford Center for Biomedical Informatics Research, Stanford University — Jan 2019 – Apr 2019

- Developed computer vision algorithms for brain cancer survival prediction from 3D MRI data with a proportional hazards regression model

Research Assistant, Clinical Imaging Research Center, Singapore — Mar 2017 – Aug 2018

- Developed a Bayesian model to discover subtypes of autism spectrum disorder from large-scale brain imaging data
- Investigated associations between the identified subtypes and behavioral symptoms using multivariate statistical analyses

Research Assistant, National University of Singapore — Aug 2015 – Feb 2017

- Developed a computer vision algorithm to detect orientation and grasp-type of household objects in real-time with an event-based vision sensor
- Implemented the orientation and grasp-type detection algorithm on a prosthetic hand for real-time grasping of household objects
- Integrated tactile sensors into the prosthetic hand to improve grasp accuracy

CONFERENCES AND PRESENTATIONS

American Epilepsy Society (AES) Annual Meeting 2020, USA Dec 2020

- Poster presentation, "From Adults to Neonates: Transfer and Meta-learning Approaches for Knowledge Generalization in Deep Networks for Electroencephalographic Analysis"

Organization for Human Brain Mapping (OHBM) 2018, Singapore Jun 2018

- Poster presentation, "Latent Factors with Dissociable Functional Connectivity Patterns, Behaviors and Demographics in Autism Spectrum Disorder"

12th IEEE International Conference on Biomedical Circuits and Systems (BioCAS), Shanghai, China Oct 2016

- Poster presentation and live demonstration, "Orientation Estimation and Grasp Type Detection of Household Objects for Upper Limb Prostheses with Dynamic Vision Sensor"

AWARDS

- Electrical Engineering Departmental Fellowship, Stanford University Sep 2018 – Jun 2019
- Honorable Mention for live demonstration "Real-time Orientation Estimation and Grasping of Household Objects for Upper Limb Prostheses with Dynamic Vision Sensor", IEEE BioCAS 2016 Oct 2016
- Dean's Lister, National University of Singapore Jan 2013 & Aug 2014
- Science and Technology Undergraduate Scholarship, National University of Singapore Aug 2012 – Jun 2016
